NET CONTENTS: Up To 5 Gallons

**KEEP IN COOL
STORAGE AREA
FARM USE ONLY**

Manure Digester

Liquefy Manure Solids—Bust Crusts— Reduce Emissions

Recommended Monthly Maintenance Application:

BEST RESULTS
WHEN APPLIED
WITHIN 30-45 DAYS
of RECEIPT

GESTATION/FARROWING 1 quart per 250 sows	NURSERY 1 gallon per 1,000 hogs	FINISHING 1 gallon per 1,000 hogs
Divide Application Equally Between Pits – SHAKE WELL & Pour in Multiple Locations Directly in to Pits/Lagoons		

CLEAN UP OF SOLIDS:

BUILDING PITS:

Initially double the maintenance application for two to four months, depending upon severity of the solids build up.

LAGOONS & STORAGE BASINS:

Contact PitCharger (888-231-1002) for individual application recommendations.

LIQUID REQUIREMENTS:

Bacteria product must have liquid to properly work. Ideally a 2 or 3 to 1 ratio of liquids to solids. When recommended levels are not available, contact PitCharger for specific application directions.

USE OF DISINFECTANTS:

To promote optimum use of PitCharger, apply after residual period of disinfectant, usually 1 to 3 days. This can be obtained by calling manufacturers phone number on product label.
